

## SWA-100W Water Slip Analyzer Alarm

The WSA-100R Water Slip Analyzer Alarm is designed to protect CEMS and standalone gas analyzers from water contamination due to gas conditioner failures. This component can be specified for any new AMP-Cherokee chiller or added to existing systems where analyzer sampling protection was not provided. The waterslip is used inline with the sample gas flow for emergency protection to sample pump, analyzers, etc. A 24" sensor cable allows flexible PCB mounting locations

Designed for long term performance and reliability, all AMP-Cherokee CEM components can be custom configured for OEM or replacement applications.

### Features

Alarm: 5A dry SPST contact closure alarm  
 Operation: vacuum or pressure  
 Construction: Teflon fitting with stainless steel sensors  
 Power: 120VAC

### Ordering Option

The WSA-100W can be ordered with or without the filter assembly shown above.
